## 8 Signal relays

## Main features

Signal relays configurable as NO or NC

Activation/deactivation time configurable

Activation current up to 2 A

Relays real time status on leds

## Description

Module with 8 signal relay outputs that are able to be configured as NO or NC depending on the requirements of the application. It also provides a write function in order to activate or deactivate pulses at any output. The duration of the pulse is variable and is programmed on the equipment; the minimum value is 1 ms .
